

AI-Driven Market Linkage and Smart Cataloging Mobile Application for Marginalized Artisans

- **Problem Statement ID** – SIH26090
- **Problem Statement Title-** AI-Driven Market Linkage and Smart Cataloging Mobile Application for Marginalized Artisans
- **Organisation:** Ministry of Social Justice and Empowerment (MoSJE)
- **Theme** - Miscellaneous
- **PS Category-** Software
- **Team ID-** 126401u
- **Team Name** – Team Zero Click

IDEA TITLE

IDEA/SOLUTION:

CraftLink AI — a “virtual business manager” for artisans who have never sold online. One photo + one spoken sentence becomes a market-ready listing.

- **Photo-based product capture**
Background removal, lighting fix, e-commerce framing.
- **Voice-first input**
Local-language speech-to-text — no typing, no English.
- **Automatic catalog generation**
SEO title, description, category and keywords.
- **Evidence-based pricing**
Materials + labour + market bands, shown to the artisan.
- **Buyer & market matching**
ONDC-ready listings; feeds MoSJE's Bharat-TULIP.

Target Users: Rural & marginalized artisans

PROBLEM RESOLUTION:

- **No professional photos** — AI removes cluttered backgrounds, corrects lighting, formats to e-commerce standards.
- **No English, low digital literacy** — local-language voice notes become SEO-friendly descriptions; zero typing.
- **No pricing knowledge** — ML suggests a competitive price from materials, labour and market trends, with reasons.
- **Only seasonal melas** — Dilli Haat, Surajkund and Shilp Samagam give weeks a year; this gives 365 days.
- **Middlemen take the margin** — direct artisan-to-buyer linkage through ONDC and Bharat-TULIP.

UNIQUE VALUE PROPOSITION (UVP):

- **Voice-first, local-language cataloging** — photo + spoken sentence → publishable listing in minutes.
- **Evidence-based pricing, not a black box** — the artisan sees why a price was suggested and can override it.
- **Built on India's public digital rails** — Bhashini for language, ONDC for reach, Bharat-TULIP for MoSJE linkage.
- **Human-in-the-loop by design** — nothing publishes until the artisan approves the AI's words and price.

KEY DIFFERENTIATOR

Not another marketplace — an AI co-seller that does the photography, copywriting and pricing an artisan cannot, then hands the finished listing to the marketplaces that already exist.

TECHNOLOGIES USED:

AI & ML:

- **Computer Vision** — rembg, OpenCV
- **Speech-to-Text** — Bhashini / Whisper
- **LLM** — multilingual listing
- **Scikit-learn** — price band model

FRONTEND:

- React + TypeScript + Tailwind
- Mobile-first PWA · Recharts

BACKEND & DATABASE:

- Python + FastAPI
- SQLite / PostgreSQL + SQLAlchemy

INTEGRATIONS:

- ONDC Seller APIs · Bharat-TULIP
- REST APIs + JSON
- .env — secure configuration

HOW IT DELIVERS VALUE:

CORE INNOVATION:

- **From craft to commerce** — one AI pipeline turns a photo + a spoken sentence into a market-ready listing, prices it with evidence, and pushes it to ONDC and Bharat-TULIP.

TECHNICAL FEASIBILITY:

- ✓ **AI Integration:** Computer Vision, Bhashini/Whisper ASR, LLMs and ML automate photo clean-up, listing and pricing.
- ✓ **Web + Mobile Architecture:** React + FastAPI, shipped as an installable mobile-first PWA — no specialised hardware.
- ✓ **Multilingual Interaction:** Local-language voice input removes typing and digital-literacy barriers.
- ✓ **Proven Stack:** Every component is open-source and already running in our working prototype.

OPERATIONAL FEASIBILITY

ECONOMIC VIABILITY:

- ✓ **Zero cost to the artisan** → no listing fee and no commission; the artisan keeps the margin.
- ✓ **Low-cost deployment** → open-source AI plus Bhashini's free government APIs; no per-listing licensing.
- ✓ **Publicly fundable** → fits MoSJE corporation (NSFDC / NBCFDC / NSKFDC) and CSR funding routes.
- ✓ **Sustainable expansion** → new languages, crafts and markets added without infrastructure change.

CHALLENGES:

- ✓ **Image Quality** → Poor product images may reduce AI accuracy.
- ✓ **Voice Accuracy** → Accents and local-language variations may affect transcription.
- ✓ **AI Reliability** → Generated product information may require human correction.
- ✓ **Market Data** → Limited or changing market data can affect price and demand insights.
- ✓ **Digital Adoption** → Some artisans may have limited experience with online platforms.

MITIGATION STRATEGIES:

- ✓ **Image Preprocessing** → Improve image quality before AI analysis.
- ✓ **Voice Processing** → Bhashini + Whisper handle accent and dialect variation.
- ✓ **Human Verification** → Allow artisans to review and edit AI-generated details.
- ✓ **Data Validation** → Cross-check market trends before generating pricing recommendations.
- ✓ **Simple User Interface** → Keep the workflow easy for users with limited digital experience.

SOLUTION POTENTIAL:

- **Working prototype today** — photo → voice → listing → price → order, end to end.
- **Phase 1 (0–3 months):** Android/PWA pilot, one craft cluster, 3 languages.
- **Phase 2 (3–9 months):** Bhashini's 22 scheduled languages; ONDC + Bharat-TULIP live.
- **Phase 3:** Scale through NSFDC, NBCFDC and NSKFDC artisan networks.

IMPACT ON STAKEHOLDERS:

1. MoSJE BENEFICIARY ARTISANS (SC, OBC, DNT, Safai

Karamcharis, PwD)

→ **Year-round digital market access** without English, a camera or digital skills.

2. BUYERS & CUSTOMERS

→ **Authentic, discoverable crafts** with GI-aware categories and honest, explained pricing.

3. ARTISAN COMMUNITIES & CLUSTERS

→ **Craft and livelihood preservation** — traditional skills gain visibility and commercial value locally.

4. MoSJE & ITS CORPORATIONS (NSFDC / NBCFDC / NSKFDC)

→ **A measurable digital channel** extending Bharat-TULIP beyond seasonal melas.

OUR MISSION:

“To empower India’s artisans with AI-driven, language-inclusive tools that turn traditional craftsmanship into market-ready products, enabling wider market access, fairer opportunities, and sustainable livelihoods.”

BENEFITS OF OUR SOLUTION:

➤ Higher Market Reach

A 365-day online storefront instead of a few exhibition weeks a year.

➤ Better Earning Potential

Direct buyer linkage removes the middleman cut — today up to 60% of product value.

➤ Language-Inclusive Commerce

Voice in the artisan’s own language; Bhashini covers all 22 scheduled languages.

➤ Faster Product Onboarding

Photo + voice → publishable listing in minutes, not a day of form-filling.

➤ Smarter Buyer–Artisan Matching

Categories, GI tags and demand trends drive discovery.

From making products to reaching markets — one platform removes the digital barriers between India’s ~7 million artisans and their buyers.

REAL-WORLD OUTCOMES:

More Visibility

Higher Income

Business Growth

Stronger Communities

Sustainable Future

1. Ministry of Social Justice and Empowerment, Government of India.

Bharat-TULIP (Traditional Artisans' Upliftment Livelihood Programme) — e-marketplace for marginalized artisans; launched 5 Nov 2024, 1,500+ artisans onboarded.

<https://nbcfdc.gov.in/nbcfdc/web/tulip>

2. Ministry of Social Justice and Empowerment, Government of India.

PM-DAKSH — skilling and livelihood support for SC, OBC, EWS, DNT and Safai Karamchari artisans. <https://socialjustice.gov.in/>

3. Development Commissioner (Handicrafts), Ministry of Textiles, Government of India.

Crafts Clusters of India — artisan development, marketing and cluster support; India Handmade marketplace. <https://handicrafts.nic.in/>

4. Bhashini — National Language Translation Mission, MeitY, Government of India.

ASR, machine translation and TTS across the 22 scheduled Indian languages (300+ models). <https://bhashini.gov.in/>

5. Open Network for Digital Commerce (ONDC), DPIIT-backed initiative.

Seller Network Participant onboarding, digital cataloguing and marketplace discovery. <https://www.ondc.org/>

6. Intellectual Property India, Government of India.

Geographical Indications (GI) — protection of handicrafts and traditional products (318 GI-tagged crafts). <https://ipindia.gov.in/>

7. India Brand Equity Foundation (IBEF), Ministry of Commerce & Industry.

Indian Handicrafts Industry — ~7 million artisans; handicraft exports ₹33,122 crore in FY 2024-25. <https://www.ibef.org/exports/handicrafts-industry-india>

ALIGNED WITH INDIA'S DIGITAL PUBLIC INFRASTRUCTURE

Bhashini — language access · **ONDC** — market reach · **Bharat-TULIP (MoSJE)** — artisan marketplace · **GI Registry** — craft authenticity · **PM-DAKSH** — artisan skilling
